

---

Hello, my name is **Will Harrison**. I am a React and Node developer from Sandpoint, ID. I focus on excellence in user experience, product design, and technical quality.

## Technologies

## Experience

### Javascript Developer

2014 - Current Raygun Labs  
2017 - 2018 TripCraft  
2017 Market Igniter  
2016 - 2017 Ziggie Ecommerce  
2014 Kochava

As a Software Developer, I work to improve the user experience by automating business workflow, reducing complexity and increasing reliable output. I have experience with Front and Back End development, writing APIs, building databases, and building intuitive user experiences to interface with the data.

React, Redux, React Router 4, and various styling libraries.

Node, Express, Hapi, SocketIO.

SQL Server, MySQL, PostgreSQL, MongoDB, and Rethinkdb.

Experience working on existing code bases as well as starting projects from the ground up.

Enterprise and startup experience.

## Retail Data Analyst

2005 - 2014 Coldwater  
Creek

2000 - 2005 HEB Grocery  
Company

2016 - 2017 Ziggie  
Ecommerce

As a Data Analyst, I make sense of large data sets. I build reports, forecasts and data models to provide business direction. I have more than a decade's experience as a Retail Inventory Planner and Sr. Allocation Analyst. I've managed multiple multi-million dollar retail categories at once.

Excel, VBA, SQL, Python

Forecasting and analysis of inbound and outbound inventory.

Created numerous processes and tools to streamline the flow of inventory from the warehouse to the store.

## Business Analyst

2011 - 2013 Coldwater  
Creek

2016 - 2017 Ziggie  
Ecommerce

As a Business Analyst, I have been a Subject Matter Expert for an SAP implementation while working with a team that created in-house Allocation and Replenishment software to interface with SAP. I was responsible for user training, documentation, SOPs, and testing of the simultaneous projects. These projects went live on time with no critical defects.

Business Analyst, SME, and Product Manager for concurrent Agile and waterfall style projects.

Lead Product Designer for an Allocation and Replenishment system, giving the analysts the ability to manage inventory at granular and macro levels.

## Education

Full Stack Web Development –Devtree Academy

Communication –Hardin-Simmons University
